## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2635

1. This Office action is in response to the application filed September 16, 2003. Claims 1-16 are pending.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-16, the items within parenthesis should be deleted since it is not clear of whether the broad term or the narrower term within the parenthesis defines the scope of the invention.

Regarding claims 1 and 10, it is not clear what is means by locking. It is not clear what address flag means. It is not clear what function the timer provides. The claim appears to be a collection of parts without any cooperative relationship.

Regarding claim 6, it is not clear what is meant by "product module function selection switch control."

Regarding claim 9, this claim does not make sense.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with

Art Unit: 2635

which it is most nearly connected, to make and/or use the invention. It is not clear from the narrative specification or the claims what constitutes the invention and/or how to make or use the invention. The invention appears to be defined by what it is not than what it is. It is not clear how the searching and locking functions are performed.

6. Due to the deficiencies of the specification and claims above, no prior art rejection is presented because the Examiner is unable to determine the invention or the scope of the invention as defined by the claims. However, the Examiner has cited a few Patents that appear to within the field of programmable universal remote control devices.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 571-272-3068. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
